```javascript
// server.js
const express = require('express');
const mysql = require('mysql');
const bodyParser = require('body-parser');

const app = express();
app.use(bodyParser.json());

const db = mysql.createConnection({
    host: 'localhost',
    user: 'root',
    password: 'password',
    database: 'easymed'
});

db.connect((err) => {
    if (err) {
        throw err;
    }
    console.log('MySQL connected');
});
```

```
// API endpoints for patient registration,
appointments, etc.

app.listen(3000, () => {
    console.log('Server is running on port
3000');
});
```
